Supporters/Opponents Message Test – Statement A

[Message statement A – 'Governments Should Work Together'] Recently, Maryland Governor Wes Moore and some in the Maryland state legislature have proposed a new policy encouraging the construction of more housing here in Maryland, including high-density housing such as townhomes and apartments. Supporters of doing this say the state government already leads on important issues such as our roads and our school systems. Local community governments should be willing to work with the state on the crucial subject of housing, too. Opponents of doing this say it is important to preserve local community control over housing in our neighborhoods. Our local governments are the ones closest to the people, and the people already living here should have final say in our communities' housing situations. Generally speaking, do you [support or oppose] the state government passing a new policy to encourage the construction of more housing here in Maryland?

Supporters/Opponents Message Test – Statement B

[Message statement B – 'State Government Should Step In'] Recently, Maryland Governor Wes Moore and some in the Maryland state legislature have proposed a new policy encouraging the construction of more housing here in Maryland, including high-density housing such as townhomes and apartments. Supporters of doing this say the lack of housing, including high-density housing, here in Maryland shows that the current approach has failed. It is time for the state government to step in and show leadership where local community governments have failed. Opponents of doing this say it is important to preserve local community control over housing in our neighborhoods. Our local governments are the ones closest to the people, and the people already living here should have final say in our communities' housing situations. Generally speaking, do you [support or oppose] the state government passing a new policy to encourage the construction of more housing here in Maryland?

Support State Officials' Reelection

If your state senator or state delegate voted AGAINST policies to lower housing costs throughout Maryland, would you be [more likely or less likely] to support them in their reelection?

Greater Greater Washington - Maryland YIMBY

Online sample of 814 voters fielded from February 14 to February 28, 2024.
Margin of error: +/-4.7%.

This survey is based on 814 interviews conducted by YouGov on the internet of registered voters in Maryland. The sample was weighted according to gender, age, race/ethnicity, education, Maryland geographic region, 2020 Presidential vote, and 2022 midterm election turnout based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey. Respondents were selected from YouGov to be representative of registered voters in Maryland. The weights range from 0.02 to 6.01 with a mean of 1 and a standard deviation of 0.94.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetted sample is approximately 4.7%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + \text{CV}^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey. Some items withheld for future release.
